Happy Summer!

I hope everyone is enjoying summer where ever you are at and also staying cool.

We decided to skip the June and July research meeting and instead start planning for August. Please take a moments to complete the doodle poll at the link below by this Thursday June 30th at 5:00pm PST so that I can select the meeting time/date that is best for the majority of the group. I plan to then send a meeting evite out on July 1st (this Friday) to the group.

<http://doodle.com/poll/3wkpfg2prnyht4q5>

Also, below is an update from Heidi regarding the research status along with the attached pictures....
A quick update on what's happening in the lab! . On Wednesday, I transferred the fungi to their second round of VW spiked petri dishes; generation 2. Growth measurements will be taken on days 2, 4, and 6, before transferring the cultures to organic rye grain. Today is day 2, and I just finished measuring the growing mycelium with the help of a new volunteer (Martina Davis). Attached are a couple photos from today, (which are part of my experimental documentation).

Thank you,

Aimee S. Navickis-Brasch, PhD Candidate, PE
